The afternoon. Helen pulled up the sage and Camass - also asters so things look quite cleaned up and tidy. Hugo has just picked the beans so things are coming done.

Pop is talking of - going over Clark Summit way and getting some tomatoes to can as they have had no frost yet.

Pop is the best natured and I think the most agreeable he has ever been. I guess trying to make up for what he did the last few days. He is making great plans in doing things so guess the financial picture seems better to him. All hands took dinner pails and have gone to Richmond date so we have just John for dinner.

Don't you wish you had taken some cookies or cake back with you? Found another mouse in the carpet sweep, - guess we must have quite a few or at least more than we know of.
